

# knowledge is the **key** to your health care

**Lab Tests Online** is a website developed by professionals who work in clinical laboratories. Whether you are a patient or carer, it will show you how lab tests are used in health care.

**Lab Tests Online** provides the following:

- > detailed descriptions of tests
- > descriptions of illness, cross-referenced to relevant tests
- > news on advances in laboratory testing
- > links to other free internet services that can help answer questions about your health and treatment

**Use the information on Lab Tests Online to be better informed about your own health care.**

Use the other side of this card to make a note of the tests requested by your doctor. When you get home, just log on to **www.labtestsonline.org.uk** and find out all you need to know.

# Lab Tests > ONLINE UK

Use the tick boxes opposite to identify which tests your doctor has requested for you. Then look up the tests on our website at

**www.labtestsonline.org.uk** and learn more about them.

We have listed some of the more frequently requested tests. If a particular test is not listed, just write it on the blank lines and look it up on the website.

- Allergy Test (RAST)
- B12 / Folate
- Bilirubin
- Calcium (Ca)
